Omnibus Society Presidential Weekend 2023 PHRG presentation 8 October

The Origins of Lincolnshire Bus Operators Peter White

Introduction

- This is a revised version of the presentation given at the Presidential Weekend ion October 2023, available via the OS website. Some minor revisions have been made, and text added to make the description more self-explanatory.
- It draws on research conducted from the early 1960s onward, when it was still possible to meet some of the operators who had established services in the 1920s and 1930s in person.

Personal background to Peter White

Born in Grimsby (N E Lincs)

OS member since 1963 (currently express services correspondent)

Founded Lincolnshire Transport Review with Alan Tye 1963 (now the Lincolnshire and East Yorkshire Transport Review, edited by Graham Lord) Lecturer in Public Transport Systems, Polytechnic of Central London from 1971 (now Emeritus Professor, University of Westminster)

Definition of 'Lincolnshire' for this talk

- Whole county as up to 1974, i.e. three 'parts' of Lindsey, Kesteven and Holland, subsequently split into two-tier authorities of Lincolnshire and Humberside
- Humberside abolished and replaced by unitaries of North Lincs (centred on Scunthorpe) and North East Lincs (Grimsby area).
 Humberside name remains for airport
- Lincolnshire part of East Midlands region, unitaries part of Yorkshire and Humberside.
- Mostly in East Midlands Traffic area, small part in south east in Eastern.

Lincolnshire railways and tramways around 1900

- Fairly comprehensive network, operated mainly by Great Central in north and west (main areas of industrial growth), Great Northern in east and south
- Light Railways Act 1896 enabled some additional lines (notably Isle of Axholme). All market towns served except Caistor
- Many stations a considerable distance from places after which they were named, low frequency services
- Later lines built to give direct Lincoln Skegness route (1913) and to serve Immingham docks (1912)
- Street tramways converted from horse to electric Lincoln (municipal) and Grimsby-Cleethorpes (Great Grimsby Street Tramways Co. [GGST], a subsidiary of Provincial Tramways Co)
- Also the Grimsby & Immingham Electric Railway (interurban tramway GCR 1912)

Country carriers

Provided informal goods and passenger services to market towns (similar to those around Salisbury described in Sam Mullins talk at LT Museum 14 November 2022)

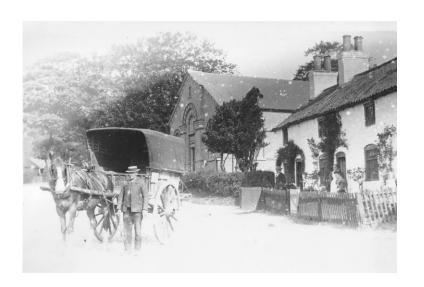

Right Upper: Cart of Dobbs of Swaby near Alford, 1890s

Right lower: Carriers' carts at Louth c1910

(both from W.E.R. Hallgarth collection)

Example – entry from Kelly's Lincolnshire Directory 1896 for Billingborough (note earlier spelling of 'Bourne')

Carriers:—
Benjamin Riddington, to Sleaford, on mon. returning same day; to Bourn, thurs. only
Edward Archer, to Grantham, on sat.; & Spalding on tues
Stephen Bradley, to Bourn, thurs.; Sleaford, on mon.; & Grantham, on sat

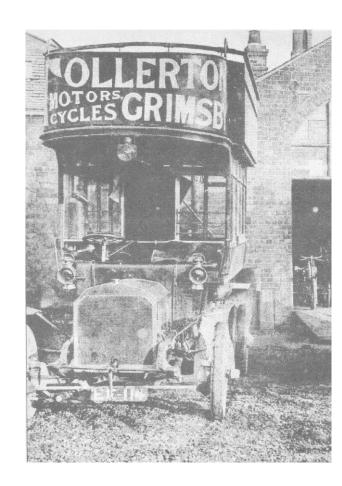

Early bus operations

First significant case the Mail Motor Company,
Grimsby – Keelby - Caistor service July 1906,
followed by local services to Waltham and Laceby.
Proved short-lived, ceasing around June 1907.
Vehicles sold to Provincial and used to establish
local services in Grimsby area 1909, to Waltham,
Laceby and Caistor (the last withdrawn when Enterprise
& Silver Dawn commenced Scunthorpe - Brigg –
Caistor - Grimsby service in 1925)

Right: EE314 of Mail Motor Co. Dennis 34-seater, sold to Provincial Tramways Grimsby 1909, via Gosport & District (from Chris Richardsen of the Provincial Society)

Provincial Grimsby operations in 1926

Vehicle shown is an all-Guy BB of 1926

Motorised country carriers and new entrants

Existing market day services converted to motor vehicle operation from around 1918, typically using a Ford T, and slightly larger vehicles later.

Offered some improvement in frequency and days of operation, especially the services operated by new entrants to the industry

Above: Ford T EE794 of Bontoft, Middle Rasen

c1921 (borrowed from operator 1965)

Bus services typically focused on same towns (Bourne, Sleaford, Grantham etc.) but in two cases on towns created during rail era which replaced older market towns (Skegness for Wainfleet, Scunthorpe for Winterton)

Early independents still in operation (in addition to Delaine)

- Hornsbys of Ashby, Scunthorpe. Began 1914, almost certainly longest-run case of motorbus operation. Ashby - Scunthorpe service operated from then
- Grayscroft (C.W.Barker) of Mablethorpe, 1922-3
 Mablethorpe Manby Louth service
- Right: Chevrolet 14-seater used to inaugurate service via Manby
- (copy of original contact print from C.W.Barker)

- F.Hunt of Alford (formerly a driver for Wrights),
 March 1930, Alford Spilsby Eastville Boston service
- Many other operators from 1920s still running in 1960s and later, but now disappeared

Early regional companies

- Clacton & District Lincolnshire ops from 1922 radial interurban routes from Lincoln. Ran under name 'Silver Queen', company registered under this name 1926. Lincolnshire ops recast as Lincolnshire Road Car Co (LRCC) 1928, with headquarters at Bracebridge Heath
- Progressive Motor Omnibus Services. Right: Progressive Straker
 Established operations at Boston 1921, Squire DO2692, on Brigg followed by branch at Scunthorpe 1922. Scunthorpe service
 Absorbed by W. T. Underwood Ltd, along (Philip Battersby collection)
 with E&SD (slide 13). Scunthorpe area services
 to E&SD, Boston area to United (below) September 1927.

• United Automobile Services. Operations in East Anglia from 1914, and also south Lincolnshire (above), as well as North East England. Split in 1 Jan 1931, with East Anglia operations passing to Eastern Counties, and those in Lincs to Road Car.

A bus represented as relief carving in wood

A feature of St Botolph's parish church Boston (locally known as 'Boston Stump') is the wooden ceiling of the nave, restored in the late 1920s. Carved bosses represent doners of funds. That of an early bus can be seen in the centre of the view below left, the stencil (below right) making the outline clearer. 'U.B.S.' presumably refers to United Bus Services.

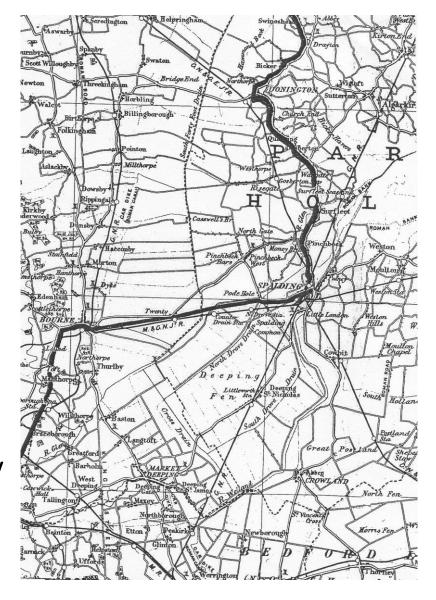

LRCC boundary definition 1929

Part of map from boundary specified when became part of Tilling/BAT

(source: Bus Archive).

Area south and east of black line left to United Automobile Services. Following 1931 changes, Road Car also served eastern fringe and Spalding -Kings Lynn route, Eastern Counties and Delaine the area to south.

Note low-density fenland zone around the South Forty Foot Drain, drained late 18th/early 19th century See article in PHRG journal 227 for fuller details.

Enterprise and Silver Dawn (E&SD)/Wrights

- Commenced operations in Scunthorpe area 1922 as Silver Dawn' charabanc ops of Arthur Drury, merging to become Enterprise & Silver Dawn Motors Ltd 1924.
 Briefly part of group owned by W T Underwood Ltd. 1925-27. Subsequently expanded through north Lincolnshire by acquisition of smaller operators.
- Major growth in steel industry drove urban growth and bus demand.
- Re-established as Enterprise (Scunthorpe) Passenger Services Ltd. 1947
- Sold to BTC 1950 with a fleet of 145, becoming the 'Northern Area' of LRCC with separate management and timetable book.
- Wright of Louth established network extending to Lincoln and Boston. Likewise,
 sold to BTC with fleet of 38, and incorporated in LRCC 1950

Road Car in the 1930s

- Steady expansion by acquisition following 1930 Road Traffic Act, including many local 'area' companies, e.g. Mablethorpe & Sutton M.S., Skegness M.S., Scunthorpe United M.S. (within E&SD's territory), Friskney of Horncastle, etc., a total of 46 operators between 1931 and late 1939. Some rural services may have reached peak of frequency and coverage (but not ridership) in 1939.
- Fleet remained dominated by small vehicles only about 5 doubledeckers in 1939 in a fleet of about 300

Lincoln municipal operations

- Lincoln Corporation Transport (LCT) empowered to run buses under Lincoln Corporation Act 1915, but confined within boundary
- First bus service November 1920
- Single tramway route replaced by buses 1929, growth in services as new housing estates built.
- Strong ridership growth 1940s to peak in 1950 (about 300 trips/head/year)
- Enlargement to include Birchwood area to south west early 1980s

Grimsby and Cleethorpes municipal operations (1)

- Grimsby Corporation acquired its part of GGST from Provincial in 1925, replacing one tramway route by trolleybuses 1926, and rest in 1936. First motor buses 1927.
- Provincial continued running trams in Cleethorpes, and local bus services (but some routes sold to GCT 1934).
- Cleethorpes UDC (later MB) started own bus services 1930, acquiring its part of tramway and remaining Provincial bus operations 1936, converting tramway to trolleybus 1937.
- Provincial continued as bus operator in Hampshire: H Orme White (no relation) being MD in Grimsby and Cleethorpes to 1937, and still in this role at Hoeford in 1960s.

Grimsby and Cleethorpes municipal operations (2)

- Grimsby abandoned 1926 trolleybus route in 1955
- Merger of municipal operations from 1 Jan 1957, running from Grimsby depot. Remaining trolleybus route closed 1960
- Early adopter of one-person-operation and minibuses
- Intense competition with Road Car late 1980s

Right: GCT MCW Metrorider and Road Car VRT, Victoria Street, Grimsby

Sale of municipals

- Both municipals set up 'arms length' companies under 1985 Act
- Following 1985 Act, period of strong competition between LCT and LRCC (including LCT minibus ops in Gainsborough and Scunthorpe), but financial difficulties.
- LCT sale to Yorkshire Traction 1993 (and hence to Road Car)
- Period of competition between GCT and Road Car from 1986.
 Operations sold to Stagecoach 1993 for £4.4m, but unlike Lincoln highly profitable (operating margin of 9.7% in 1992-93, and return on capital of 25.3% in 1990-91) MD Les Warneford to Stagecoach, becoming UK Bus MD to 2012.

Types of journey 1: Shopping and Leisure

- No surveys to establish trip purpose as we have today, but we can infer likely purposes from timetables
- Rural services of 1920s and 1930s showed few early morning journeys suited to work or education, but often high frequency evenings and Sundays – implies substantial leisure travel (as in many other areas). Growth of cinemas, no television, employment still local.
- Timings suited to journeys to work did not emerge until later, e.g. Caistor to Grimsby post-WW2. Parallels with Norfolk case described by Ben Colson in his book 'A Journey's End' (2021)
- Subsequent decline in leisure, and later in shopping

Example of a service geared to leisure

"RELIANCE" MOTOR SERVICE

Commencing Saturday, April 3rd, 1926.

SCUNTHORPE—WEST BUTTERWICK

(Blue Bell Hotel)

SATURDAYS ONLY.

Types of journey 2: work

- Important in urban areas from an early stage, e.g. to Docks in Grimsby, steelworks in Scunthorpe, mainly on scheduled public services
- Growth in specialised 'works bus' services, especially to locations outside towns (e.g. Humber Bank between Grimsby and Immingham), either licenced (sometimes as 'express') or free of charge to workers
- Very large catchment developed around Scunthorpe steel industry, served by mix of main operators and specialised contract services (e.g Smaller of Barton-on-Humber, Johnson of Goxhill, etc.)
- Declined following changed employment patterns and growth in car ownership
- But some recent examples, e.g. to Bakkavor fresh prepared food processing plants

Example of 'works' services – from Road Car timetable 1967 (note 8-hour shift pattern)

Types of journey 3: education

- Some limited provision in 1930s, but rapid growth postwar following expansion of secondary education and closure of village schools
- Lindsey County Council operated own fleet of school buses (to very basic specification) but most provision by strengthened public services at peak times, or contracted-in services.
- Scope for inter-working of school peak
 with market day and Saturday shopping services
- Now dominant role for bus and coach industry in many rural areas.
- Post-Covid, important to compare ridership within term-time and at other periods

Lindsey CC Bedford KFW808 at Reynolds St., Cleethorpes August 1965

(Lincolnshire Transport Review)

Road Car from 1950

Peak of demand around 1950, and also network size, following absorption of Enterprise and Wrights Highly-standardised 'Tilling' Bristol/ECW fleet, over 100 of SC4LK model Shift of HQ from Bracebridge Heath (works) to new bus station and depot at St Mark Street Lincoln 1959

Later contraction in south (closure of Sleaford, Boston, Grantham and Holbeach depots) with concentration in larger urban areas.

Period of intensive competition following deregulation in 1986, with independents, municipals, and also Eastern Counties on Boston town services.

Sale to Yorkshire Traction Group under privatisation 1988, then of latter to Stagecoach 2005. Absorption of LCT and GCT, with rationalisation of depots

Operation in south has resumed with transfer of Spalding – Holbeach

- Kings Lynn service from Stagecoach East

Road Car network in 1950

• Principal codes:

B Bardney

C Cranwell

GA Gainsborough

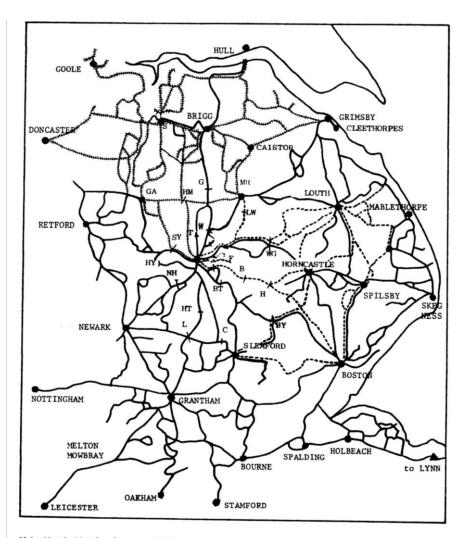

L Leadenham

MR Market Rasen

Scunthorpe

SY Saxilby

- Note that independent services not shown: many market day/Sat only, but also daily routes, e.g. Hudson's Horncastle – Bardney Lincoln, Holme Delight's Boston - Donington – Spalding
- First published in 'Passenger Transport in Lincoln' (OS 1973)

Major Lincolnshire Bus Operators in 1950

Plain lines represent Lincs. Road Car services. hatched lines, Enterprise, and dotted lines, Wrights services.

Changes in the independent sector

Retirement of pioneer operators of the 1920s in the 1960s (e.g. Cropley of Sutterton) *Right : Lincolnshire Standard 1966 EX9777 Bedford SBG/Plaxton of 1956.*

Absorption of many operators by Appleby of Conisholme (Hudson of Horncastle, Trott of Nettleham etc.). Likewise, Kime of Folkingham (becoming a worker co-operative) took over Holme Delight and services of other operators, including some Road Car replacements

Appleby also took over operations in east Yorkshire, but eventually into administration early 2004. Coach brand name passed to Bowens Travel of Birmingham and then to Radley of Coach Travel of Brigg.

Kime services passed to Brylaine and others

'Second generation' of substantially-sized independents: PC Coaches of Lincoln (established 1978) now with 125 vehicles, and Brylaine of Boston.

Rail closures

- Further closures from 1950s, culminating in East Lincs line (Grimsby Louth – Alford – Boston - Spalding – Peterborough) and associated branches in 1970.
- In some cases, buses already provided parallel alternative, e.g. Lincoln

 Grantham, but not in others (East Lincs). Replacements often
 provided to meet localised cases of 'hardship', rather than based on
 strategic potential of improved interurban links, and often short-lived
 (parallels with Norfolk case)
- Some stations reopened, and also Spalding Peterborough line.
- Suggested recreation of Boston Spalding link in 2021.

InterConnect network

- Commenced 1999, funded through Rural Bus Challenge.
- Most services operated by Road Car, two independent
- Hourly (or better) frequencies
- Strong ridership growth, especially on Lincoln - Horncastle – Skegness
- Most journeys commercially viable up to Covid
- Dedicated livery largely dropped, but reintroduced recently on Kings Lynn - Spalding route

Right: Road Car Scania 15655 in InterConnect colours at Harmston on service 1, 28 August 2014 (Paul Hill)

Interconnect network map 2011

- Interconnect services in bold colour lines
- 'I' symbol represents interchange with CallConnect DRT services
- All run by LRCC except Lincoln Boston (Brylaine)
- Brylaine also run on Boston Skegness Core network same today, but other services changed
- Louth Horncastle is semi-fixed, with requested diversions from route as shown

Call Connect services

- Launched with Interconnect 1999
- Mix of fixed routes and DRT (then 'Call Connect Plus'), almost all now DRT and simply known as 'Call Connect'
 About 300,000 trips p.a. prior to Covid Attains coverage of areas not served by fixed routes (almost all of county, apart from small area around Lincoln)

Above: A Call Connect Plus 8-seater at Spilsby interchange
August 2002 (PRW)

Operator market shares

• From BSIPs Oct 2021, in terms of vehicle-km on registered public services

•	North Lincs (a)	NE Lincs (b)	Lincs ^(c)
 Stagecoach 	81%	99.96%	54%
Hornsbys	19%	-	-
 Other operators 	-	0.04%	46%

- (a) From BSIP, pp 10-16. Shares shown of combined Stagecoach and Hornsby total; also small operations by East Yorks (fixed route, and DRT) and Isle Coaches
- (b) From BSIP, p17. Non-Stagecoach share comprises section within council area of two return journeys per week on shopping services. Very high overall share due to acquisition of both municipal and Road Car operations, and winning contracts for rural services
- (c) BSIP does not give bus-km, but lists 27 operators running a total of 275 services (pp12-13), of which Stagecoach comprises 31%. However, it is likely that the Stagecoach share of bus-km was far higher, as many of the independent services were probably registered school operations. An earlier estimate for 2015-16 from DfT Table 1001b 'Operator market share of weekly bus trips by local authority area, England' is shown. In this case, the second largest operator (at 19%) was a contractor for the 'Call Connect' demand-responsive minibus services, running much smaller vehicles than Stagecoach, and hence a much smaller share of capacity and ridership than Stagecoach.
- Overall, passengers carried would be a better indicator of market share than services provided, but such data are not published
