

THE OMNIBUS SOCIETY : LONDON HISTORICAL RESEARCH GROUPINDEX TO GROUP BULLETIN : Numbers 1 to 50F O R E W O R D

The fiftieth number of the London Historical Research Group Bulletin was published in February 1981 and, by that time, some 392 pages of printed matter had been produced, covering a very large number of matters dealing with the historical aspect of London's buses, coaches, railways and tramways.

At this time, there had been several requests for some form of Index to the Bulletin which would provide a speedy route to all the details published on a specified subject.

It was, therefore, decided by the Convenors that an index should be provided covering, in the first instance, the original fifty issues, and from then onwards indexes would be provided covering every ten issues, so that the next one will be produced after Bulletin No. 60 has been published in October 1982.

NOTES ON THE INDEX AND HOW TO USE IT

The Compiler has perused thoroughly the first fifty issues of the Bulletin, and all matters discussed in them have been listed, together with the page numbers on which they have appeared. In the case of lengthy articles, only the commencing page number is shown.

Although the majority of the subjects have been listed alphabetically, certain items have needed comprehensive sub-divisions, and these have been provided for the following :-

East Surrey Traction Company Ltd.,
London General Omnibus Company Ltd.,
London County Council Tramways,
London Transport (General Index).

Additional smaller sub-sections covering the appropriate subjects will be found under the alphabetical section concerned. These are :-

A. E. C. Limited,
National Omnibus and Transport Company Ltd.,
National Steam Car Company Ltd.,
Green Line Coaches Ltd.,
Thomas Tilling Ltd.

There have been three distinctive periods of route numbering covering the London bus routes, these being :

- (1) from 1908 to 1924;
 - (2) from 1925 to October 1934;
- and (3) from October 1934 for the present time.

Separate indexes have been provided covering each period, and those for sections (1) and (2) include the routes worked by both the London General Omnibus Company Ltd. and the independent operators of the 1922-1934 period, while section (3) covers all London Transport bus routes, both Central and Country Areas. On the subject of Country Bus routes, the sub-sections covering the East Surrey Traction Company and the National Omnibus and Transport Company contain details of any of their routes mentioned in the Bulletin. However, in the Country Area prior to the formation of London Transport, there were many small operators working only one or two routes, and details of these (if mentioned in the Bulletin) will be found by consulting the various items mentioned under the operator's name.

There are separate route indexes covering the London County Council Tramways and London Transport (Tramways and Trolleybus Section), but details of the routes operated by the smaller tramway systems (if mentioned in the Bulletin) will be found by consulting the various items under the name of the tramway system concerned.

The respective London bus garages and tramway depots are listed twice in the Index, first of all in the alphabetical sections, and then under the operator concerned. For instance, taking Chalk Farm Garage as an example, a complete list of entries concerning that garage will be found under alphabetical section "C", whilst those concerned with the L.G.O.C. period of ownership will also be found under that special section, with those concerning the London Transport period of ownership also listed under that special section. This system also applies to the tramway depots.

A list of the fifty issues has also been included (Index page 3), showing the date of each issue and, in order to trace any item, the following procedure must be followed :

Taking Acme Pullman Services Limited as an example, by consulting section "A" in the Main Index, we find the Company is mentioned on page 319. Turning to the list of Issues, we find that Issue No. 42 (October 1979) covers pages 318 to 327, and thus carries the item on page 319 that is being sought.

In a work of this size, it is possible that there are errors and omissions, despite the fact that every effort has been made to keep them to a minimum. The Convenors would be grateful, therefore, if these could be brought to the attention of the Compiler, Mr. A. W. McCall, 3 Rectory Close, Godalming, Surrey GU7 1TT. Similarly, if any one has suggestions for the improvement of this Index which could be incorporated in the next issue, the Compiler would be pleased to hear of them.

Godalming,
Surrey.
1 February 1982.

LIST OF ISSUES - LONDON HISTORICAL RESEARCH BULLETIN

<u>Issue No.</u>	<u>Date of Issue</u>	<u>Page Numbers</u>

LONDON BUS ROUTES 1925 - 1934

This period covers those years when the London Traffic Act (1924) was in operation and the Public Carriage Office of the Metropolitan Police was responsible for route numbering. During this period, suffix letters were only used for "short workings". As these operations were somewhat numerous, only the main route number has been used in this index.

Route No.	Pages	Route No.	Pages
