

THE OMNIBUS SOCIETY

LONDON HISTORICAL RESEARCH GROUP

LONDON PASSENGER TRANSPORT BOARD

ROUTE and VEHICLE ALLOCATIONS 7th June, 1939

Compiled and produced by R.G.Westgate with
acknowledgements to A.F.Andrews, Esq., M.Inst.T.
(One time Schedules Superintendent (Road Services)
L.P.T.B.) and numerous members of the
Omnibus Society.

DECEMBER, 1967

PRICE 2/6

INTRODUCTION

To me the transfer of London's buses from one garage to another has proved a fascinating study over the years. I hope that my observations thereon may be of some interest to others.

Having advanced beyond the stage of collecting bonnet numbers, and in so doing recording movements from one garage to another, I began to ask myself why? As time passed the reasons for such moves, if not immediately obvious, became apparent, and began to fall into a set pattern.

The overhaul programme being a continuous process was probably the most frequent, if not the most obvious of the reasons for vehicle transfers. Increases in services, re-allocation of routes to different garages, and the complementary transfer of specific types, new routes, change of types operating routes, replacement of obsolete vehicles by new ones, and in 1939 conversion from petrol to oil engines, accounted for many more moves.

The first six months of 1939 saw vehicle movements under all these headings, culminating in the opening of Alperton garage code (ON) on Wednesday 7th June, which terminated a busy night involving all varieties of transfers.

In early January, 1939 route 241 was converted from DA type to T type operation. Sidcup garage (SP) was also involved in the petrol to oil conversion programme which necessitated their exchanging a large number of LT(D/D) type with Leyton (T), Norwood (N), Streatham (AK) and Tottenham (AR) garages.

During February and March all the open back LT(D/D) buses were concentrated at Leyton (T) and Loughton (L) garages. This caused exchanges with both Plumstead (AM) and Nunhead (AH) garages. The only exception was LT21 which was fitted with an oil engine and had consequently been allocated to Mortlake (M) garage. The four experimental LTs 1000, 1051, 1202, 1203, then working from Streatham (AK) garage were withdrawn from service at the end of April.

Moving to the STL type mention must be made of the petrol to oil conversion that was initiated at Catford (TL) and Chalk Farm (CF) garages. This involved transfers between Catford (TL) and Camberwell (Q), while Chalk Farm (CF) changed with Middle Row (X) and Willesden (AC). Hanwell (HW), now renamed Southall received delivery of new STLs towards the end of March, and transferred older STL to numerous garages, having first replaced their oil-engined TD type operated on route 18C, which were withdrawn. A typical series of moves in early May sent STL to Holloway (J) who released ST type to Edgware (EW) for service augmentation.

Turning to the Country area, new STL were delivered to Northfleet (NF) at the beginning of both May and June. Subsequent to the May deliveries Northfleet (NF) sent older 56 seaters to Dorking (DS), who transferred an equal number of 48 seaters to Windsor (WR), who were thus able to withdraw an equivalent number of TD type. The June movements were more complicated. Northfleet withdrew some TD type and sent older 56 seaters to Leatherhead (LH) and Dartford (DT). The former transferred a similar number of 48 seaters to Windsor (WR) who again withdrew TD type. The latter sent ST type to Grays (GY) who also withdrew TD type.

Romford London Rd (RE) were taking delivery of TF type coaches from the end of March. They displaced LOT10 type coaches to replace 9T9 type at numerous garages. This permitted the transfer of some 9T9 type to the bus fleet, and facilitated the withdrawal of some of the older T type, many of which were being converted for use as garage lorries. The arrival of the TF private hire coaches at Old Kent Road (P) heralded the transfer of some of the LTC type to Holloway (J) garage, thus making an operating base to the north of the Thames as well as the south.

Certain of the older re-bodied 1LT11 type buses were transferred from the Country to the Central area to operate on route 211 out of Hanwell (HW) garage. The C type displaced being used to replace DA type which were being gradually withdrawn from service. A process to be completed when the rear-engined CR type were delivered.

So much for the prelude to the opening of Alperton (ON) garage on 7th June, 1939. At many garages vehicles were being parked in side streets overnight to comply with fire regulations limiting the number of buses inside a garage. Operational requirements demanded a larger allocation of buses than these fire regulations deemed a safe number to be kept inside the garages concerned. The associated vehicle movements now to be commented on will illustrate this point.

Some indication of the changes in route allocations is necessary to appreciate the reasons for the various transfers. I trust that Mr. C.G.V. Taylor will forgive my modified reproduction of his schedule, published in the Omnibus Magazine of December 1939. Monday to Friday allocations are dealt with, the Saturday and Sunday alterations being less numerous. Each garage involved will now be taken in turn and should be studied in conjunction with the schedule of variations in route allocations.

* = Ph.o.

+ = P.h. and evening

Alperton (ON) received 58 STL :- 4 ex Camberwell, 5 ex Chalk Farm, 33 ex Cricklewood, 15 ex Hanwell, and 1 ex Merton. Here it can be noted that a further 3 STL were transferred from Hanwell during the following week presumably when more new vehicles were delivered to them. M-F schedules required 57 buses from Alperton :- 7 on Rte 18, 15 on Rte 46, 9 on Rte 79, and 26 on Rte 83.

Camberwell (Q) sent 4 STL to Alperton and received only 3 from Chalk Farm. No variation in workings for the loss of one bus.

Chalk Farm exchanged 1 STL with Sutton, received 8 from Middle Row, and sent 5 to Alperton, and 3 to Camberwell. Here there was no change in the total fleet allocated or route workings.

Clay Hall (CL) exchanged their entire fleet of 54 petrol STL with Upton Park for an equal number of oil STL. Once again no variation in the fleet total or route allocation.

Cricklewood (W) lost 33 STL to Alperton losing 63 duties :- 25 on Rte 13, 15 on Rte 46, 4 on Rte 79, 8 on Rte 113, 7 on Rte 121, and 4 on Rte 240, but gaining 30 duties :- 23 on Rte 28, 6 on Rte 60, and 1 on Rte 231, net loss 33 duties. They also lost 5 LT(S/D) and 4 duties on Rte 240 to Edgware, and gained 7 Q(S/D) and 6 duties on Rte 231 from Willesden.

Dalston (D) lost 6 workings on Rte 60 thus enabling them to transfer 6 STL to Palmers Green.

Edgware (EW) received 11 LT(S/D) :- 5 ex Cricklewood and 6 ex Palmers Green, taking over 4 duties on Rte 240 and 6 on Rte 251.

Enfield (E) sent 1 C type to Hornchurch and received 2 DA type from Leyton with no change in the M-F route allocation.

Hanwell (HW) transferred 15 STL to Alperton and received 6 new ones. They lost 12 workings on Rte 83 and gained 5 on Rte 81, thus losing 9 vehicles and 7 workings.

Harrow Weald (HD) sent 4 STL to Willesden, and 6 ST to Middle Row, losing 10 duties :- 7 on Rte 18 and 3 on Rte 183.

Hendon (AE)'s allocation of STD type was not involved in the vehicle movements. It may be noted here that 7 ST were allocated temporarily to them during an overhaul programme from late 1938 to March 1939. They did however lose 1 duty. 48 duties lost:- 26 on Rte 28, 12 on Rte 52, 10 on Rte 83, were replaced by 47 duties:- 25 on Rte 13, 8 on Rte 113, 7 on Rte 121, 3 on Rte 183, and 4 on Rte 240.

Hornchurch (RD) received only 1 C type from Enfield for 2 additional workings on Rte 252A.

Hounslow (AV) like Hendon had no fleet changes. They lost 3 duties on Rte 81, and 3 on Rte 110A. enabling them to cover 6 duties on new Rte 110B.

Leyton (T) transferred their 2 DA type to Enfield, losing 1 working on Rte 229 converted to D/D operation, extended to Ilford Broadway, and re-allocated from Seven Kings as Rte 129.

Merton (AL) lost 1 duty on Rte 137 and sent 1 STL to Alperton.

Middle Row (X) lost their 21 STL:- 8 to Chalk Farm and 13 to Willesden. In exchange they received 6 ST from Harrow Weald and 17 from Willesden. They lost 13 workings on Rte 52 and acquired 15 on Rte 18B making an increase of 2 workings and 2 vehicles to operate them.

Palmers Green (AD) received 6 STL from Dalston and 1 from Upton Park giving them 7 extra buses to cover 8 additional duties on Rte 112. Their 6 LT(S/D) and 6 duties on Rte 251 were transferred to Edgware

Seven Kings (AP) lost 1 LT to Upton Park, and 1 working as the 4 workings lost on Rte 25A were replaced by only 3 workings on new Rte 129. (D/D operation of Rte 229 extended).

Upton Park (U) sent 54 oil STL to Clay Hall and 1 to Palmers Green, receiving 54 Petrol STL from Clay Hall and 1 LT from Seven Kings. No variation in Route allocations occurring.

Willesden (AC) received 17 STL:- 4 ex Harrow Weald and 13 ex Middle Row, and transferred 17 ST to Middle Row. They lost 26 duties:- 15 on Rte 18A, 1 on Rte 18B, 5 on Rte 79, 4 on Rte 83, and 1 on Rte 231, gaining 25 duties on Rte 52 - a net loss of 1 duty. They also transferred 7 Q(S/D) and 6 duties on Rte 231 to Cricklewood.

The reduction of 3 workings on Rte 28 was due to the withdrawal of the peak hour journeys to Park Royal Stn (Und.). An increased service to this point being provided by a peak hour service on Rte 112 from Finchley (Manor Cottage Tavern) hence the 8 extra workings.

The Country area details are not so comprehensive as the Central area as the economic use of vehicles entailed operation on several routes during the course of a day in many cases.

In conclusion I wish to acknowledge all those members of the Omnibus Society, too numerous to mention individually, and the late Mr. A.F. Andrews, onetime Schedules Superintendent (Road Transport), L.P.T.B., without whose assistance the production of this publication would not have been possible.

R.G. Westgate.

September 1967.

SPECIAL CENTRAL AREA BUS ROUTE 7/6/39

Waterloo	- Strand(Aldwych)	J	J	-
----------	-------------------	---	---	---

The following points should be borne in mind when studying the bonnet numbers of the vehicles allocated to garages.

1. The lists are based on observation of the garage code letters which by 1939 were painted inside the driver's cab, usually over the entrance, and thus easily visible from the nearside.
2. Parent and sub sheds frequently borrowed buses from one another to cover docking and overhaul programmes. In this connection Hounslow (AV) and Uxbridge (UX), and Kingston (K) and Weybridge (WB) can virtually be regarded as synonymous.
3. Weekend borrowing occurred to meet the increased demand for a particular type at certain garages e.g. Edgware (EW) borrowed STL type from Cricklewood (W) to cover extra workings on 141.
4. Both points 2 and 3 applied particularly to the single deck fleet when maximum operation was on Saturdays only.
5. In the Country Area on certain routes some buses and coaches did not return to their home depot each night.
