THE OMNIBUS SOCIETY  
LONDON HISTORICAL RESEARCH GROUP  
BULLETIN : VOLUME 3

INDEX

Compiled by David A.Ruddom

NOTES ON THE INDEX AND HOW TO USE IT

This Index covers Volume 3 of the Group Bulletin which comprises Numbers 80 to 91 inclusive issued between March 1987 and December 1989

The method and format follows that used for the four volumes of index previously published for Volumes 1 and 2. The items quote the page numbers on which they appear and pages covered by each Bulletin are shown in the List of Issues at the end of the Index. If an item appears more than once in a different context on the same page, the number of times it appears is shown in brackets alongside the page number, e.g. 76(2). The alphabetisation used is on the "all through" principle, e.g. S type buses comes after Stroud Green.

A few larger subjects such as London General Omnibus Company are shown as headings in their alphabetical place with specific matters listed beneath.

London bus routes are dealt with within the three distinctive periods used in previous index volumes, these being:

- (1) from 1908 to November 1924
- (2) from December 1924 to September 1934 during which period all suffix letters are ignored.
- (3) from October 1934 to the present time.

In this index postal districts have been omitted but where clarification of the location of a street name is thought to be needed it is given.

In an index of this nature it is possible there are errors and omissions although every effort has been made to keep these to a minimum. The Convenors would be grateful if these, together with any suggestions for the improvement of future index volumes could be brought to their attention.

London Bus Routes: Dec.1924 - Sep.1934

The following list of routes operated during those years in which the London Traffic Act (1924) was in force and the Public Carriage Office of the Metropolitan Police was responsible for route numbering. During this period suffix letters were only used for "short workings". As these operations were somewhat numerous, only the main route number has been used in this Index.
